SPECIFIC COMMENTS TO AUTHORS

In this case report and review of the literature, some comments are listed 1.The English writing is poor, it should be edited by English native speaker. 2.Regarding the treatment, p1, last line, it is wrong about“ resection of the common hepatic conduct” , it will be

“duct”. Please confirm whether the patient received bil. hepatojejunostomy or other ?
wording“ start immunotherapy with nivolumab.” was suggested. Please check“ The
patient remains disease-free 36 months after metastatic lung lesion rather than initial
diagnosis (surgery for CHD). 3.P2, conclusion, it is confused when you said “primary
metastatic biliary melanoma”. It should be” primary biliary melanoma, S/P resection
with lung metastasis, treated successfully with immunotherapy” 4.Page 2, in
case presentation, you performed Cholangio-NMR first, then did abdominal CT scan. Is
it useful for diagnosis if you perform CT scan after NMR. Do you perform ERCP before
surgical intervention ? 5.Page 3, is it IV or oral for nivolumab? 6.Page 4, I did not
understand the sentence” This case reveals the excellent response to immunotherapy for
all kinds of patients regardless of the primary origin of the melanoma.” It should be
rewritten. 7. Pag4, Conclusion, it still mild confused when you described “The case of
the patient with metastatic primary biliary melanoma” please verify it.

primary metastatic biliary melanoma treated....after diagnosis". The reader would be confused about the primary or metastatic melanoma of biliary tract. The sentence should be rewrite to "pulmonary metastatic biliary melanoma". 2. What is Cholangio-NMR? This abbreviation should be explained. 3. The figure of CT should be demonstrated in this manuscript. CT findings should be described more details. 4. There are some benign biliary stricture condition that should be preoperatively excluded including IgG4-related sclerosing cholangitis. How about the serum IgG4 level? 5. How about the preoperative cytology and biopsy? ERCP was performed? 6. What is the learning point in this case?

SPECIFIC COMMENTS TO AUTHORS

Thank you for the report of a rare case. I have some question. 1. In page 1, what did "NMR" mean ? 2. 5 criteria was shown to diagnose primary melanoma in page 3. What items did the case meet? 3. I couldn't find figure 2 and 3. 4. In table 3, what did "CHC"
