

April 25, 2019

Dear Editor In chief:

We are pleased to re-submit our manuscript entitled “**The Broken Heart: A matter of the ER stress bad management**” by Dr. Belmadani and Dr. Matrougui for consideration in your **World Journal of Cardiology**.

We believe the review summarizes and updates the role of the endoplasmic reticulum stress in heart complications.

We look forward hearing from you

Sincerely yours,

Khalid Matrougui, PhD, FAHA
Tenured Associate Professor
