## Primary gastric choriocarcinoma: A rare case

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC4573415>

**Primary gastric choriocarcinoma** is a rare and highly aggressive tumour characterized by the presence of a double cell population and early metastases, especially in the liver, lung and regional lymph nodes . Several theories have been proposed to explain the pathogenesis of PGC. The most widely accepted is the dedifferentiation theory.
