

## **Answer to Editor and Reviewers**

Dear Editor and Reviewers,

I made revisions to the manuscripts according to your comments. Markups are highlighted in yellow throughout the text.

We hope that the revised version will fulfill the requirements for publication in the World Journal of Clinical Cases.

Thank you very much.

Please note that, as previously communicated, the Authors' list has been slightly changed, by switching Serban E-D. with Indio V., i.e. moving Serban E-D. from 2<sup>nd</sup> to 4<sup>th</sup> position and Indio V. from 4<sup>th</sup> to 2<sup>nd</sup>. Considering that all other Authors' positions were not affected by such changes, and considering difficulties in collecting all signatures once again, I have attached a new Copyright License Agreement signed only by Serban E-D., Indio V. and myself as Corresponding Author. Thus, I kindly ask you to consider that this new document complements the previous one, which includes all other signatures.

thank you for your suggestion. In order to provide additional info about the genetic analysis, we have expanded the genetic section of the manuscript also including new figures and a supplementary table;  
a footage of TTE of our patient has been included.

### **Answering to second reviewer's comments:**

Thank you for your suggestion. Molecular characterization has been emphasized, also adding an illustrative figure for the sake of clarity.

### **Answering to third reviewer's comments:**

Thank you for your suggestion. In order to make the best view of the cardiac mass, we

added a footage of TTE.

Thank you for considering the review.

Kind Regards,

Maristella Saponara, MD
