

Answering Reviewers :

The reviewer 03563654 kindly requests to include the articles :

1) "hemorrhoidal disease and the other perianal diseases must be classified according to difficulty of operation (Turkiye Klinikleri J Gen Surg-Special Topics. 2018;11(2):112-4)

My reply:

The journal is Turkish and is not provided neither by PubMed nor by Google. We are not able to trace the above reference at the internet and this is the reason that we did not to include it at the present Editorial.

2) (Prague Medical Report / Vol. 117 (2016) No. 4, p. 145–152)

My reply:

The article is titled : Novel Approaches in Pilonidal Sinus Treatment. I did not find any relations with the Editorial and so I assume it is not to be included in the references.
