

PEER-REVIEW REPORT

Name of journal: World Journal of Clinical Cases

Manuscript NO: 47284

Title: Correlation between intracoronary thrombus components and coronary blood flow after percutaneous coronary intervention for acute myocardial infarction at different onset time

Reviewer's code: 02855134

Reviewer's country: Italy

Science editor: Jin-Lei Wang

Reviewer accepted review: 2019-04-08 10:34

Reviewer performed review: 2019-04-24 09:10

Review time: 15 Days and 22 Hours

SPECIFIC COMMENTS TO AUTHORS

This is an interesting study about the correlation between intracoronary thrombus components and coronary blood flow after stent implantation in direct percutaneous

coronary intervention in acute myocardial infarction. The study is well designed and the results are interesting. The methods are in detail. In this study, 154 patients with direct percutaneous coronary intervention were enrolled. The TIMI blood flow after stent implantation was recorded based on digital subtraction angiography during percutaneous coronary intervention. The number of patients with no-reflow and slow blood flow in each group was counted. Statistical analysis was performed based on data such as onset time, thrombus component, and TIMI blood flow. Tables and figures are very interesting. The references are updated, and well discussed. Some minor language polishing should be corrected.

SPECIFIC COMMENTS TO AUTHORS

Interesting study. The manuscript is well written. The figures and tables should be moved to the end of the text. How about the IRB statement? I didn' find it. Please add it.
