To whom it may concern,

I, Danielle Jacqueline Deremo Cosimo, certify that I revised the article entitled, “TLR9 polymorphisms and *Helicobacter pylori* influence gene expression and risk of gastric carcinogenesis in Brazilian population” by Manoela Dias Susi et al. I am a native speaker of English with a degree in linguistics from the University of California, Berkeley and I am certified in Portuguese-English translation by the American Translators Association. I received the article in English and edited it for grammar and fluency. I declare that the article is, to the best of my knowledge and ability, a true and correct revision of the original version I received. I performed an editorial review of this article in January 2018 and the author paid me for my professional services. Acceptance or rejection of my suggested changes is at the sole discretion of the author. I am not responsible for the final version of this article.
