Subject- Permission to collect patient data for NEO-REGISTRY

Study title- "NEO-REGISTRY: To determine safety and performance of NeoHexa Sirolimus-Eluting Coronary Stent System (SES) in all-comer patients with coronary artery disease (CAD) in one year follow-up period."

Dear Sir,

I have planned to conduct the retrospective investigator initiated clinical study of Neohexa stent called Neohexa registry. The registry will include the patients who were implanted with Neohexa stent between 10 Jul 2015 to 31 July 2016, completed the one year follow-up and have signed the hospital consent form. These data will be gathered from hospital medical records and will be compiled to a case report form developed for the purpose of the study. We will ensure the anonymity of the data collected. Kindly grant us the permission for the same.

Regards

Dr.J.Rajagopal (MD.DM)
