Surveillance and Diagnosis of Hepatocellular Carcinoma

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC4836577>

Detection of Hepatocellular Carcinoma at an Early Stage Improves Outcomes. The goal of HCC surveillance is to detect disease early in its development in order to initiate potentially curative interventions and reduce overall morbidity, mortality, and the financial burden on the health care system.

The cost effectiveness of HCC surveillance is driven by the threshold incidence of HCC in the population. In populations with a high incidence of HCC, HCC surveillance with ultrasound with or without AFP levels likely is cost effective. 7 x 7 Ruggeri, M. Hepatocellular carcinoma: cost-effectiveness of screening. A systematic review.

Hepatocellular carcinoma

Medical Condition

A common type of cancer affecting liver

The most common form of liver cancer often seen in people with chronic liver diseases like cirrhosis.

-  Rare (Fewer than 200,000 cases per year in US)
-  May be preventable by vaccine
-  Often requires lab test or imaging
-  Treatment from medical professional advised
-  Can last several months or years

Caused mainly due to the chronic infection of the liver or DNA mutation of the liver cells. Characterized by unexplained weight loss, upper abdominal pain and yellowing of the skin. Treatment options include hepatectomy, target drug delivery and the use of radiation to kill the cancerous cells.

Symptoms

The early stages of the disease do not present any symptoms but in the later stages the symptoms which are noted are as follows:

- Upper abdominal pain
- Weight loss
- Jaundice
- Fluid in the abdomen
- Liver failure

Surveillance and diagnosis of hepatocellular carcinoma: A systematic review

Sonia Pascual, Cayetano Miralles, Juan M Bernabé, Javier Irurzun, Mariana Planells

Abstract

BACKGROUND

Hepatocellular carcinoma (HCC) appears in most of cases in patients with advanced liver disease and nowadays is the first cause of death in this population. Surveillance of HCC has been proposed and recommended in clinical guidelines,
