## Postoperative complications in gastrointestinal surgery: A “hidden” basic quality indicator

De la Plaza Llamas R *et al.* Postoperative complications: A “hidden” quality indicator

Roberto De la Plaza Llamas, José M Ramia

### Abstract

Postoperative complications represent a basic quality indicator for measuring outcomes at surgical units. At present, however, they are not systematically measured in all surgical procedures. A more accurate assessment of their impact could help to evaluate the real morbidity associated with different surgical interventions, establish
