The Discovery of Down Syndrome

Their Fight For Human and Civil ...

Down Sy

According to the National Down Syndrome Society, Down syndrome was first recognized in 1866 by British physician John Langdon Down. He helped to set the condition apart from mental disability by coining the first term used to describe those with Down syndrome: "mongoloid". In Down's opinion, the children with the genetic condition shared similar characteristics to the people of the Mongolian race. The term "Down syndrome" was suggested later by a group of geneticists who wrote to the British m...

Obstructive airway in Morquio A syndrome, the past, the ...

<https://www.sciencedirect.com/science/article/pii/S1096719215300536>

Patients with Morquio A rarely live past their third decade of life due to severe spinal cord complications or a combination of obstructive and restrictive lung disease. As children with Morquio A grow older, they often assume a "look up to the sky" position to help alleviate airway obstruction [19] , [20] .

Abstract

Takotsubo syndrome is a wide spectrum disease with a dramatic clinical presentation mimicking acute coronary syndrome albeit without obstructive coronary disease and typically manifests in the backdrop of intense emotional or physical trigger. Pathophysiology is incompletely understood with multifactorial mechanistic pathways circling around a heart-brain-endocrine axis. Several anatomic and phenotypic variants exist with varied clinical manifestations. The aftermath of Takotsubo syndrome is not always benign and both short- and long-term complications can occur which may impact its prognosis. Several gaps in knowledge exist providing an impetus for tremendous future research opportunities.

Key words: Takotsubo syndrome; Triggers; Pathophysiology; Anatomic variants; Prognosis

Core tip: Further research is necessary in order to better understand the underlying triggers and pathophysiologic principles of Takotsubo syndrome which will help optimize both in-hospital acute and long-term management pathways.

Genetics of Takotsubo Syndrome - Heart Failure Clinics

[https://www.heartfailure.theclinics.com/article/S1551-7136\(16\)30050-2/fulltext](https://www.heartfailure.theclinics.com/article/S1551-7136(16)30050-2/fulltext)

Takotsubo syndrome (TTS) is an enigmatic disease with a multifactorial and still unresolved pathogenesis. A genetic predisposition has been suggested based on the few familial TTS cases. Conflicting results have been published regarding the role of functional polymorphisms in relevant candidate genes, such as α 1-, β 1-, and β 2-adrenergic receptors; **G protein-coupled receptor kinase 5**; and **estrogen receptors**.

Takotsubo cardiomyopathy - Wikipedia

<https://en.wikipedia.org/wiki/Takotsubo> ▾

Takotsubo cardiomyopathy, also known as **stress cardiomyopathy**, is a type of **non-ischemic cardiomyopathy** in which there is a sudden temporary weakening of the muscular portion of the heart. This weakening may be triggered by emotional stress, such as the death of a loved one, a break-up, rejection from a partner or **constant anxiety**. This leads to one of the common names, **broken heart syndrome**. **Stress cardiomyopathy** ...
