Title: Ultrasound-guided fascia iliaca compartment block combined with general anesthesia for amputation in an acute myocardial infarction patient after percutaneous coronary intervention: A case report

Reviewer's code: 00227375

Reviewer's country: Japan

Science editor: Ying Dou

SPECIFIC COMMENTS TO AUTHORS

This is an interesting case report about ultrasound-guided fascia iliaca compartment block in a patient with myocardial infarction who underwent emergency middle thigh amputation due to septic shock. This manuscript is nicely structured and very interesting. I have no question about this manuscript.

Dear reviewer:

thank you so much for your reviewing! We deeply appreciate your recognition of our manuscript.

Best regards,

Sincerely

Dear Editors :

Thank you for your letter

entitled “Ultrasound-guided fascia iliaca compartment block combined with general anesthesia for amputation in an acute myocardial infarction patient after percutaneous coronary intervention: A case report” (ID: 47988). Those suggestions are all valuable and very helpful for revising and improving our paper, as well as the important guiding significance to our manuscript. We have studied suggestions carefully and have made correction which we hope meet with approval. Revised portion are marked in red in the paper. The main corrections in the paper are as flowing:

(1) We have provided a language certificate from the MedE Medical Editing Group, which is visible in the accompanying documents.

(2) The original image has been into ppt and submitted in the accompanying documents.

(3) Our manuscript format has been set to 12 pt Book Antiqua font and 1.5 line spacing with ample margins.

(4) Peer-to-peer reply has been provided to the reviewer's comments and modify manuscript according to guidelines and formats

(5) Running title:Using perioperative analgesia with FICB for Amputation in AMI patient after PCI

(6) We have provided all the authors' affiliations with Department, University or Institute, City, Postcode, Country, etc.

(7) We have provided all the authors' ORCID number

(8) The surgical informed consent has been uploaded as accompanying documents

(9) Corresponding author's phone and fax have been added

(10) We have updated the reference list and add references with accompanying textual content that will strengthen the manuscript as a literature review of the appropriate and up-to-date case-related information

Best regards,

Sincerely
