Manuscript Type: Mini review

Title: ADHD and comorbidity: A review of literature

Dear reviewer,

Thanks for your kind feedback and constructive suggestions to improve this manuscript. In accordance to the suggestions made, I have made the following changes to the manuscript:

1. I have added the significance of this review including how it highlights the need for a dimensional construct, particularly after release of DMS V diagnostic criteria (recently) and also inclusion of research recent findings in this field.
2. I have added on the neurobiological basis to comorbidity in ADHD. I have also included the suggested study on findings from study on DTI in autism corresponding to clinical severity as a possible future direction in research in this field.
3. Minor language revisions
