SPECIFIC COMMENTS TO AUTHORS

Dear Author Thank you for your nice work. My comment as below: Fatigue is one of the most important markers of chronic liver disease. This view was formed by the experience I acquired from a center which has about 2000 liver transplant. One of the reasons for fatigue is the psychosocial lifestyle, but the most important causes are

malnutrition due to liver disease, electrolyte imbalance, anemia and insufficient detoxification of the liver. I couldn't understand what information to look at '<https://icd.who.int/browse10/2016/en>'. I could not access the parameters of Table-3 from this address. Either delete this sentence or edit the web address. The article is not prepared according to the format of the wjg series. I'd like to know why the authors didn't. For me, I would like to re-evaluate this manuscript after preparing it according to the wjg series format. The first sentence of the introduction should be moved to end of the introduction section. The article is over extended (5150 words). Manuscript should be shortened. The article should only be revised to focus on the relationship between chronic liver disease and fatigue. Figure-1 should be removed from the study. Table-3 and 4 should be removed from the study.
