## Total Laparoscopic Pancreaticoduodenectomy

[www.ncbi.nlm.nih.gov](http://www.ncbi.nlm.nih.gov) › ... › JSLs › v.17(2); Apr-Jun 2013

Laparoscopic pancreatectomy has recently emerged as one of the most advanced applications of surgery, 1 and **total laparoscopic pancreaticoduodenectomy** (TLPD) has proven to be among the most advanced **laparoscopic procedures**. 2 Gagner and Pomp were the first to describe the **laparoscopic Whipple procedure** in 1994. 3 The long operative times and ...

## (PDF) Total Laparoscopic Pancreaticoduodenectomy

[https://www.researchgate.net/publication/255706312\\_Total...](https://www.researchgate.net/publication/255706312_Total...)

**Total Laparoscopic Pancreaticoduodenectomy**. There were 3 women and 2 men with a mean age of 60 years and a mean body mass index of 32.8. Intraoperatively, the mean operative time was 9 hours 48 minutes, with a mean blood loss of 136 mL. Postoperatively, there were no complications and a mean length of stay of 6.6 days.

## Total laparoscopic pancreaticoduodenectomy - Panicia ...

[jovs.amegroups.com/article/view/11174/11730](http://jovs.amegroups.com/article/view/11174/11730) ▾

**Total laparoscopic pancreaticoduodenectomy** (TLP) has remained a topic of controversy in the surgical literature during the last two decades. TLP was first reported in 1994 by Gagner and Pomp, who performed the **procedure** in the setting of chronic pancreatitis ( 1 ).

## Laparoscopic pancreaticoduodenectomy - Li - Annals of ...

[ales.amegroups.com/article/view/3604/4330](http://ales.amegroups.com/article/view/3604/4330) ▾

Laparoscopic **procedures** have become an important part of minimally invasive surgery for pancreatic disease. However, due to the complex anatomic location and numerous reconstructions, **laparoscopic pancreaticoduodenectomy** (LPD) still remains one of the most challenging **procedures** even for the experienced **laparoscopic** surgeons.

## Does Minimally-Invasive Pancreaticoduodenectomy Have ...

[www.ncbi.nlm.nih.gov](http://www.ncbi.nlm.nih.gov) › Journal List › PLoS One › v.9(8); 2014

While more and more **open procedures** now routinely performed using laparoscopy, minimally invasive **pancreaticoduodenectomy** (MIPD) remains one of the most challenging abdominal **procedures**. Therefore, we carried out this **meta-analysis** to evaluate whether MIPD is safe, feasible and worthwhile.

[jovs.amegroups.com/article/view/11174/11730](https://jovs.amegroups.com/article/view/11174/11730) ▼

**Total laparoscopic pancreaticoduodenectomy (TLP)** represents perhaps one of the most challenging **abdominal operations**. This **procedure** is gaining popularity in recent years, mostly due to the numerous reports underling its safety and feasibility in the setting of several benign and **malignant pancreatic pathologies**.
