SPECIFIC COMMENTS TO AUTHORS

This conventional review focus one treatment of HCC in patinets with PVTT. Though the review is well written, I have the following concerns. 1. The topic is not new. Too many similar reviews have been published focus on the same topic. 2. Hepatic resection

is still one of main treatment for patients with HCC involving PVTT. And so many high quality evidence with large sample size have been published. Such as (Hepatology. 2019 May;69(5):2076-2090.) (Hepatology. 2018 Sep;68(3):977-993). The authors mainly focus on sorafenib, which has only 10% efficacy for such patients. They described some case reports as evidence. I suggest they cite some high quality evidence (J Hepatol. 2019;70(4):684-691.) and some comments (J Hepatol 2016;65(5):1057-1058)
