

## Answering reviewers

Comments to reviewer code 03563654:

We would like to thank the reviewer for his positive comments. Unfortunately, we have problems in viewing the recommended article from a Turkish journal, and we have been unable to get an English version of the article.

On the other hand, when we searched for <https://doi.org/10.1016/j.ijssu.2018.04.037> the obtained article was “A survey of current approaches to thyroid nodules and thyroid operations”, without relation with Pseudomyxoma peritonei.

Comments to reviewer code 03475779:

Thanks to the reviewer for his kind comment in the awareness of the historical view of the manuscript.

Comments to reviewer code 02549888

We appreciate the comments of the reviewer, and we have included, as recommended, details about the sites and how HIPEC function in regard to this sites.
