The global cancer burden and human development: A review ...

journals.sagepub.com/doi/full/10.1177/1403494817715400

Aims: This review examines the links between **human development** and **cancer** overall and for specific types of **cancer**, as well as **cancer**-related risk-factors and **outcomes**, such as disability and life expectancy. Methods: To assess **human development**, the **Human Development Index** was utilized continuously and according to four levels (low, medium, high, very high), where the low and very high ...

The Changing Global Burden of Cancer: Transitions in ...

<https://www.ncbi.nlm.nih.gov/books/NBK343643>

Changes in fertility and life expectancy are leading to major changes in the structure of the global population and, in turn, in the scale of the **cancer** problem worldwide and at every resource level (WHO 2011b). In addition to the increasing burden of **cancer** is a changing spectrum of common cancers that is in different regions correlated with levels of **human development** (Bray and others 2012).

[PDF] Chapter 5. Social inequalities in cancer between countries

https://publications.iarc.fr/_publications/media/download/5320/a7065579cb87184159c700e...

• Major inequalities in **cancer outcomes** exist between countries. Assigned values of the **Human Development Index** (HDI), a proxy for the socioeconomic **development** of a country, can be linked to the corresponding **cancer** magnitude and profile to explain **cancer** transitions at the **national** level.

The global cancer burden and human development: A review ...

<https://journals.sagepub.com/doi/full/10.1177/1403494817715400>

Conclusions: From a global perspective, there remain clear disparities in the **cancer** burden according to **national Human Development Index** scores. International efforts are needed to aid countries in social and economic **transition** in order to efficiently plan, implement and evaluate **cancer** control initiatives as a means to reduce the widening ...
