### **Institutional Review Board Waiver**

Title: Complement Activation and Long-Term Graft Function in ABO-incompatible Kidney Transplantation

Manuscript number: 48822

In this study, anonymized patient information was retrospectively obtained and analyzed. This information was available from the Dutch Organ Transplantation Registry. All subjects consented to being included in this Registry at the time of transplantation. All subjects of this study were treated according to standard clinical practice, and their treatment or clinical outcomes were not in any way affected by their retrospective inclusion in this study.

As the subjects of this study were not subjected to procedures nor were required to follow rules of behaviour, Institutional Review Board approval was not required according to Dutch law (see <https://english.ccmo.nl/investigators/legal-framework-for-medical-scientific-research/your-research-is-it-subject-to-the-wmo-or-not>).

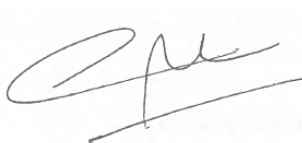

Kind regards,

Marit van Sandwijk MD, internist-nephrologist at Amsterdam University Medical Centers, location AMC (corresponding author)

Jan-Stephan Sanders MD PhD, internist-nephrologist at University Medical Center Groningen

Professor Frederike Bemelman MD PhD, internist-nephrologist and head of the Kidney Transplantation Program at Amsterdam University Medical Centers, location AMC
