

## Response to Reviewers and Editor

Dear Editor, World Journal of Clinical Cases,

Sep 30th, 2019

We would like to thank you and the reviewers for the time taken to review our submitted manuscript titled: "Metastatic infection caused by hypervirulent *Klebsiella pneumonia* and co-infection with *Cryptococcus meningitis*: A case report". We have carefully considered all the valuable comments by the reviewers and the editor, and provided an appropriate response to his/her final concern accordingly.

Sincerely,

Yunfeng Shi

### **SPECIFIC COMMENTS TO AUTHORS:**

Reviewer #1:

I must congratulate the authors of this case study. This is a very interesting case study. However, authors need to modify the manuscript as per the comments. 1. The running title of the manuscript is same as that of the main title of the paper. 2. There are punctuation problem all around the manuscript. Please look and modify accordingly. 3. References should be as per journal style.

### **Answer:**

- 1. The running title of the manuscript is same as that of the main title of the paper.**

We changed the running title to "Hypervirulent *Klebsiella pneumonia* complicated with *Cryptococcus meningitis*".

- 2. There are punctuation problem all around the manuscript. Please look and modify accordingly.**

We have looked the check version carefully and modified all the punctuation problems in the manuscript.

**3. References should be as per journal style.**

We have verified and modified the references according to the reference format of the journal.

**Special comments from the editor:**

**1. You need to provide the grant application form(s) or certificate of funding agency for every grant.**

Answer: We uploaded the contract of the Science and Technology Planning Project of Guangdong Province of China.

**2. Please provide the decomposable figure of all the figures, whose parts are all movable and editable, organize them into a PowerPoint file, and submit as “Manuscript No. - image files.ppt” on the system. Make sure that the layers in the PPT file are fully editable. For figures, use distinct colors with comparable visibility and consider colorblind individuals by avoiding the use of red and green for contrast.**

Answer: We have submitted the “Manuscript No.49019 - image files.ppt” according to the requirements of the editor. We changed colors of figure 2 so that colorblind individuals can distinct them clearly.
