

## **Answering Reviewers**

Thank you for your review and the opportunity to revise our paper “Constrictive pericarditis as a cause of refractory ascites after liver transplantation – case report”. We appreciate your insightful comments about this paper. I have included the reviewer comments immediately after this letter. The revisions have been approved by all authors, and the revised manuscript is attached in this email message.

### COMMENTS FROM REVIEWER #1:

“A well written concise and pertinent Case Report for those involved in the care of liver transplant patients. The review of constrictive pericarditis and ascites post liver transplant is well written. This is a useful addition to the liver transplantation literature.”

### COMMENTS FROM REVIEWER #2:

“This is an interesting and well written manuscript describing a rare cause of post transplant ascites. There is a valuable lesson here and the case is worthy of publication in its current format. “
