## Constrictive Pericarditis as a Cause of Refractory Ascites

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC4435387>

Diuretics were continued and evaluation was begun for possible liver transplantation. Abdominal MRI showed sequelae of portal hypertension, but no liver lesions, steatosis, or cirrhosis. The patient continued to have refractory ascites despite adherence to a low-sodium diet and diuretics, requiring frequent large-volume paracenteses.

We report the case of a patient with refractory ascites due to a constrictive pericarditis who underwent a liver transplantation with the initial diagnosis of cryptogenic cirrhosis.

## Overlooked Constrictive Pericarditis as a Cause of ...

<https://www.sciencedirect.com/science/article/pii/S0041134509002802>

Herein we have presented a case of overlooked relapsing constrictive pericarditis with ascites in a renal transplant patient. The first symptoms of constriction appeared during hemodialysis. After a 2-year period of remission, they relapsed at 1 year after transplantation causing deterioration of renal function.

## Ascites

Abnormal Buildup

Ascites is the abnormal buildup of fluid in the abdomen. Technically, it is more than 25 mL of fluid in the peritoneal cavity. Symptoms may include increased abdominal size, increased weight, abdominal discomfort, and shortness of breath. Complications can include spontaneous bacterial peritonitis.

## Abstract

### BACKGROUND

Refractory ascites is a rare complication following orthotopic liver transplantation (OLT). The broad spectrum of differential diagnosis often leads to delay in diagnosis.
