SPECIFIC COMMENTS TO AUTHORS

well written manuscript. i have few suggestions. 1- how is the follow up of patient?
2-"Solitary fibrous tumors may be seen in any part of body"(doi: 10.5152/ejbh.2018.4132)
and (<https://doi.org/10.1016/j.ijsu.2018.04.037>) I suggest both of these uptodate studies

SPECIFIC COMMENTS TO AUTHORS

Interesting paper well written and documented as references. It should be better to explain the criteria followed in the selection of papers considered in the revision of the literature, the number of paper considered and the criteria of exclusion from the

tendency to metastasize.’, ‘Histologically, they are characterized by proliferation of spindle cells, and immunohistochemically they are positive for CD34 and BCL2 and bland for CD99.’ and ‘Clinico-radiological features are not specific therefore,’ Please explain the acronyms IGF and TACE when first mentioned in the text. The follow-up duration of the 22 cases should be noted for consideration of absences of recurrence and time to recurrence. Discussion of physical examination should follow the symptoms (before ‘Our patient was ...’ and precede the laboratory findings, including those concerning the glucose metabolism. Linguistic review is definitely required.
