October 12, 2017

Dear Dr. Kutney:

We are pleased to inform you that your FRAP proposal, has been awarded for funding in the amount of \$9,000.

We have had to reduce the approved budget due to the limited funds we have available for the program, not necessarily because the request was considered excessive. In an attempt to provide sufficient funds to get the project off the ground, we are approving amounts as shown in the table below.

Project	Budget awarded	Fees	Travel	Supplies	Animals	Other	Statistician
Hepatic Steatosis and Cystic Fibrosis Related Diabetes	\$9,000	\$7,700				\$1,300	

Keep in mind it is your responsibility to apply the funds in the most productive ways to allow you to progress your project and remember that you have some funds available from the Education office restricted for travel and education purposes that may make your FRAP award go further.

Please contact Ms. Laura Adams ([Laura.Adams@uhhospitals.org](mailto:Laura.Adams@uhhospitals.org)) regarding charging procedures and allowable expenses.

Congratulations and we look forward to the results of your project.

With regards,

Mitchell L. Drumm, Ph.D.
