This is a rare case report on a heart failure patient with Duchenne muscular dystrophy suffering hypotension after taking sacubitril/valsartan. This manuscript is nicely structured and well written. I have no question about this manuscript.

Authors describe a rare case of cardiomyopathy due to Duchenne muscular dystrophy in a 15-year-old boy. It is a very well presented case report which highlights the most common adverse effect of sacubitril/valsartan, especially in patients with NYHA IV heart failure status. I have not specific comments on the structure and the content of the manuscript.
