Basic Study

Self-efficacy for managing hypertension and comorbid conditions

Mi Jung Lee, Sergio Romero, Huan-Guang Jia, ¹ **Craig A Velozo, Ann L Gruber-Baldini, Lisa M Shulman**

Abstract

BACKGROUND

Self-efficacy is defined an individual's belief in completing necessary actions to achieve the desired goal. For individuals with hypertension and other chronic conditions, self-efficacy has been an essential factor to predict adherence to treatment behaviors.

The Association Between Self-Efficacy and Hypertension ...

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC3179559>

Self-efficacy to manage hypertension is associated with five of six JNC7 prescribed self-care activities for managing high blood pressure. Health care providers and public health practitioners should work within the context of hypertension self-care to increase patient knowledge and improve self-efficacy for hypertension management.

Development and Validation of the Hypertension Self-Care ...

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC3972381>

Adequate self-care is crucial for blood pressure (BP) control. A number of hypertension (HBP) self-care instruments are available, but existing tools do not capture all the critical domains of HBP self-care and have limited evidence of reliability and validity. The HBP SCP encompasses comprehensive ...

The role of comorbidities in patients' hypertension self ...

https://www.researchgate.net/publication/253334770_The_role_of_comorbidities_in...

Patients with comorbidities tend to place lower priority on the management of hypertension than on their other diseases (34, 35) because a diagnosis of high blood pressure is not frightening for ...

Effect of Unrelated Comorbid Conditions on Hypertension ...

<https://annals.org/aim/article-abstract/740584/...> ▾

Apr 15, 2008 · Physicians may vary in their recording of comorbid conditions. Conclusion: Patients with more unrelated comorbid conditions were less likely to have uncontrolled hypertension addressed at a visit. The effect of different types of comorbid conditions on meeting quality-of-care measures merits further investigation.
