Intraductal papillary neoplasm of the bile duct (IPNB) is a rare variant of **bile duct tumors**, characterized by **papillary growth** within the **bile duct lumen** and is regarded as a biliary counterpart ...

## Intraductal papillary neoplasm of the bile duct with ...

<https://www.sciencedirect.com/science/article/pii/S2210261218303249>

Intraductal papillary neoplasms of the bile duct (IPNB) are recognized as a subtype of biliary **tumors** including mucin-producing **bile duct tumors**, papilloma, and mucinous cystic **neoplasms**. The pattern of IPNB recurrence has been described in the **literature**, albeit unclearly. Particularly, reports on multicentric IPNB are rare.
