

## **Reviewer 1**

**Conclusion:** Accept (General priority)

**Scientific Quality:** Grade C (Good)

**Language Quality:** Grade B (Minor language polishing)

The authors have reported predictive value of mir-489 and mir-21 in melanoma and metastasis. The research findings adequately support the conclusion.

Dear Editor

First of all, we would like to express our heartfelt thanks to you for your hard work!

For the guidance and questions you made in the article, we reply and fix them one by one.

This article discusses the value of miR-489 and mir-21 in the diagnosis and treatment of melanoma, and has potential reference value for the diagnosis and treatment of melanoma in the future.

And under your active guidance, this scientific research article can be published in your magazine, for which we once again express our heartfelt thanks; finally, I hope your magazine will do better and better!
