Efficacy and Safety of Non-Vitamin K Antagonist Oral ...

<https://www.ahajournals.org/doi/full/10.1161/JAHA.118.009263>

Non-vitamin K antagonist oral anticoagulants, compared with **warfarin**, are associated with significantly lower **risk of death** but no difference in **stroke** or **systemic embolism, major bleeding**, or **gastrointestinal bleeding in patients with atrial fibrillation and impaired liver function**.

Effectiveness and Safety of Non-vitamin K Antagonist Oral ...

<https://www.ncbi.nlm.nih.gov/pubmed/28668628>

PURPOSE: The findings from the observational studies comparing the effectiveness **and safety of non-vitamin K antagonist oral anticoagulants (NOACs)** versus **vitamin K antagonists (VKAs)** for atrial fibrillation (AF) and venous thromboembolism (VTE) are inconsistent.

**Introduction**

Methods

Results

Discussion

Conclusion

Warfarin effectively reduces risks of stroke and mortality in patients with atrial fibrillation (AF).¹ However, advanced age, low body weight, and renal impairment are factors that increase the risk of major bleeding and that influence decisions regarding anticoagulant prescriptions.^{2,3} Gauging the risk of bleeding against the risk of stroke is more complex in vulnerable patients. Therefore, they are more often denied effective anticoagulants.⁴ Because non-vitamin K antagonist oral anticoagula...

Efficacy and Safety of the Use of Non–Vitamin K Antagonist ...

<https://www.ahajournals.org/doi/10.1161/CIRCULATIONAHA.117.028513>

Non–vitamin K antagonist oral anticoagulants are an effective and **safe alternative** compared with **vitamin K antagonists** in patients with **atrial fibrillation** treated with **concomitant aspirin therapy**.

Evolving Anticoagulation in AF and VTE - Medscape Education

https://www.medscape.org/sites/advances/evolving-anticoagulation?src=mkmcmr_clinad... ▾

There is strong evidence supporting the efficacy and safety of non-vitamin K antagonist oral anticoagulants (**NOACs**) in improving thromboembolic outcomes across a range of populations. Despite guideline recommendations for **NOACs** for the **treatment of atrial fibrillation (AF)** and **venous thromboembolism (VTE)**, they are still widely underutilized or inappropriately applied.

Efficacy and Safety of Apixaban Versus Warfarin in ...

<https://www.ahajournals.org/doi/10.1161/CIRCULATIONAHA.118.037955>

Guidelines caution against the use of **non–vitamin K antagonist oral anticoagulants** in patients with extremely high (>120 kg) or low (≤60 kg) body weight because of a lack of data in these populations.

Novel oral anticoagulants in patients with chronic kidney ...

<https://academic.oup.com/ndt/article/33/10/1683/4682924> ▾

Dec 01, 2017 · Nevertheless, **oral** anticoagulation is the mainstay for thromboembolic event prevention in CKD patients with AF, and hence novel **oral anticoagulants** [NOACs; sometimes also referred to as ‘**non-vitamin K antagonist oral anticoagulants**’ or ‘**direct oral anticoagulants**’ (DOACs)] could be a promising therapeutic option.
