Escitalopram-induced Liver Injury: A Case Report and Review of Literature

Qin Xiang Ng, Christl Suet Kwan Yong, Wayren Loke, Wee Song Yeo, Alex Yu Sen Soh

Abstract

BACKGROUND

Depression is a growing public health problem that affects over 350 million people globally and accounts for approximately 7.5% of healthy years lost due to disability. Escitalopram, one of the first-line medications for the treatment of depression, is a selective serotonin reuptake inhibitor (SSRI) and one of the most widely prescribed antidepressant medications worldwide. Although thought to be generally safe and with
