<https://casesjournal.biomedcentral.com/articles/10.1186/1757-1626-1-399> ▾

Dec 16, 2008 · Trichobezoars are caused by hair ingestion. The usual presentation of a trichobezoar is with early satiety and malnutrition. Obstructive symptoms and manifestations of gastric outlet obstruction may occur. The diagnosis may be suspected in young females with malnutrition, who have a history of trichophagia. We report a case of 12-year-old female admitted to the emergency room for abdominal ...
