

Dear reviewers,

**Firstly, thank you for your time for reading and Suggestions. Following your precious comments, my paper has been improved in the quality. Next, i would answer your questions respectful and carefully.**

**For the first reviewer:** **1)** The data comes from 20 world regions of according to the estimates of the worldwide incidence and mortality from 27 cancers in 2008 have been prepared for 182 countries as part of the GLOBOCAN series published by the International Agency for Research on Cancer. **2)** I have provided all the the US images. **3)** We used Color-Doppler ultrasound to detect the left axillary mass. I have made extensive use of the articles you have provided and benefited a lot. **4and 5)** I did not use the gel pad. I am sorry to say that i do not specialize in ultrasonography but I am deeply aware of the paramount importance of the US and especially color doppler ultrasound in the diagnosis of superficial in the skin and subcutaneous tissue by studying the papers you provided. I might make more mistakes, if i spend too much words to disscus a subject i do not specialize in. **6)** Thanks for your good paper very helpful to my discussion. **Figures)** I have provided figures of US imaging. **2)** I have corrected it as required.

**For the second reviewer:** Firstly, thank you for your valuable advice and I have corrected and improved it according to your requirements.

**For the third reviewer:** I may need more studying and reading experience to explore original ideas and to write better papers.

Best regards,

Authors
