Basic Study

MicroRNA-30c inhibits pancreatic cancer cell proliferation by targeting twinfilin 1 and indicates poor prognosis

Abstract

BACKGROUND

Studies have reported that miR-30c has vital functions in the development and progression of multiple cancers.

Dec 05, 2018 · miRNAs play a significant functional role in TIC-triggered NSCLC. Herein, Ma et al. demonstrate that TM4SF1 is a direct target of miR-30a/c and miR-30a/c inhibits the stemness and proliferation of NSCLC cells by targeting TM4SF1, suggesting that miR-30a/c and TM4SF1 may be useful as tumor biomarkers for NSCLC.

Dec 15, 2018 · Twinfilin-1 (TWF1) has been implicated in cell motility, invasion and migration. However, its exact role in lung cancer progression is still unclear. In the present study, we explored clinical and prognostic relevance of Twinfilin-1 (TWF1) levels for non-small cell lung carcinoma (NSCLC).
