Author: Shahid Ahmed, Punam Pahwa, Duc Le, H...

Publish Year: 2017

There is limited information available about the prognostic significance of the primary tumor location in real-world patients. We conducted this large population-based cohort study using individual patient data to confirm the prognostic importance of the primary tumor location in the general population with metastatic colorectal cancer. Methods

2016-3-16 · Background: Observational studies have suggested that patients with stage IV colorectal cancer who undergo surgical resection of the primary tumor (SRPT) have better survival. Yet the results are not confirmed in the setting of a randomized controlled trial. Lack of randomization and failure to control prognostic variables such as performance status are major critiques to the findings of the ...

Publish Year: 2015

位置: 8600 Rockville Pike, Bethesda, MD

2015-2-20 · We sought to clarify the prognostic impact of primary tumor location in metastatic colorectal cancer (mCRC). Methods: We evaluated the association between tumor location and survival parameters in patients with previously untreated mCRC receiving first-line chemotherapy ± bevacizumab in three
