Primary Gastric Melanoma - PubMed Central (PMC)

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC3104388>

Primary gastrointestinal malignant melanoma is an unusual clinical entity. Rarer still is primary gastric melanoma. Most melanomas found in the stomach are metastases from cutaneous sources. 1 Primary gastric melanoma is underdiagnosed, its symptoms and signs are nonspecific, and specific staining techniques must be used to confirm the diagnosis. The following case of primary gastric melanoma ...
