Liver transplantation for recurrent hepatic adenoma

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC3612574>

Mar 27, 2013 · In rare cases HA presents as multiple **hepatic adenomas** or **recurrent adenoma** after initial **liver resection** and in such cases LTx is the only potential cure and prevents the risk of bleeding or **cancer transformation** into **hepatocellular carcinoma**. We report the case of a 56 years old lady who underwent a **left hepatectomy** for **giant adenoma** in 2005 and resection of segment V-VI for recurrence of **liver adenoma** ...

(PDF) Hepatic Adenoma – A case report.

https://www.researchgate.net/publication/316857559_Hepatic_Adenoma_-_A_case_report

PDF | Abstract We report the case of a 32-year-old female who presented to us with incidental findings of a space occupying lesion (SOL) in liver on abdominal ultrasound (USG). She was taking oral ...

Case Report: Large hepatic adenoma in a 21-year-old male

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC3863076>

The main surgical procedure for **hepatic adenomas** should be anatomic or segmental resection. 11–13 In case of a **haemorrhage** and a surgical emergency, the lesion must be handled as **hepatic trauma**. When multiple **adenomas** or **giant adenomas** are not feasible to excise, total **hepatic vascular isolation** or **liver transplantation** has been successfully performed. 14

Giant hepatocellular adenoma as cause of severe abdominal ...

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC1950307>

Jul 27, 2007 · The authors describe the case of a **large hepatocellular adenoma** diagnosed in a 30-year old woman who came to us complaining of **acute pain** in the **upper abdominal quadrants**. The patient had been taking an **oral contraceptive pill** for the last ten years. We present the clinical features, the **diagnostic work-up** and the treatment prescribed.

Hepatocellular Adenoma (HCA) is a rare primary **benign hepatic tumour**, seen in young and middle aged women and associated with the use of Oral Contraceptives (OCP). Though generally asymptomatic, **large hepatic adenomas** are complicated by rupture and spontaneous bleeding with increased risk in tumours larger than 7cm.
