Title:	Efficacies of a tailored eradication strategy based on the presence of a 23S ribosomal RNA point mutation versus empirical bismuth-containing quadruple therapy as first-line eradication for Helicobacter pylori infection in Korean patients
Date:	2019/05/30

We hereby certify that Textcheck has checked and corrected the English in the manuscript named above.

A specialist editor with suitable professional knowledge (M.Sc. or Ph.D./M.D.) reviewed and corrected the English. An English language specialist subsequently checked the paper again. The first language of both editors is English.

Please direct any questions regarding this certificate or the English in the certified paper to: certified@textcheck.com
