The impact of helicobacter pylori infection, eradication therapy and probiotic supplementation on gut microenvironment homeostasis: an open-label, prospective clinical trial: Luyi Chen ... Cost-effectiveness of a tailored helicobacter pylori eradication strategy based on the presence of a 23S ribosomal RNA point mutation that causes ...

Name of Journal: **World Journal of Gastroenterology**

Manuscript Type: **Retrospective cohort study**

Title: **Efficacies** <sup>1</sup> **of a tailored eradication strategy based on the presence**  
**of a 23S ribosomal RNA point mutation** <sup>3</sup> **versus empirical bismuth-**  
**containing quadruple therapy as first-line eradication for *Helicobacter***  
***pylori* infection in Korean patients: A prospective, comparative, open**  
**trial**

## Bismuth-containing quadruple therapy versus concomitant ...

<https://onlinelibrary.wiley.com/doi/full/10.1111/hel.12546>

Oct 22, 2018 · To compare the efficacy, safety, and compliance of CQT and BQT as first-line therapy for H. pylori eradication in real clinical practice in an area of high resistance to clarithromycin. Methods A prospective, open, comparative cross-sectional study including dyspeptic patients >18 years with H. pylori infection and with no previous eradication treatment was performed.

## Tailored Therapy Versus Empiric Chosen Treatment for ...

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC4998617>

First-Line and Nonfirst-Line Tailored Therapy. Nine studies designed first-line tailored therapy, whereas 3 studies 21,22,25 applied salvage tailored therapy. One trial 17 performed tailored regimen as both first-line and rescue therapy. The pooled results indicate that first-line tailored therapy obtained higher eradication rates than first-line empirical regimens (pooled RR = 1.18, 95% CI ...
