## SPECIFIC COMMENTS TO AUTHORS

I have reviewed the manuscript "Pneumococcal infection transmission between family members with congenital asplenia: a case report" and found it acceptable to be published in the World journal of clinical cases. There are only few minor corrections required as follows -Remove case report from the keywords -In the laboratory results, give reference ranges of hematological parameters. Also a TLC of 6,400/microliter is not considered as elevated. Its normal however neutrophilia is present -In para 2 of discussion, write full form of anti-HIV antibodies
