## Extracellular Vesicles as Carriers of Non-coding RNAs in ...

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC5928552>

Extracellular vesicles (EVs) are small membranous vesicles secreted from normal, diseased, and transformed cells in vitro and in vivo. EVs have been found to play a critical role in cell-to-cell communication by transferring non-coding RNAs (ncRNAs) including microRNAs (miRNAs), long ncRNAs (lncRNAs) and so on.
