

Approval for Clinical Studies

Serial number of the protocol: BC (1955)

Name of the Researchers: *Nourhan Mohamed El Amir Mohamed Ibrahim*

Title of the research:

Assessment of certain long non-coding RNAs and mRNAs in Egyptian HCV patients

Approval Valid from 27/3/2017

This is to certify that the research ethics committee for experimental and clinical studies at Faculty of Pharmacy Cairo University-Cairo-Egypt has approved your research protocol.

The REC-approved consent form for clinical studies is available for your use in the study.

The Principal Investigator and his team are responsible to get all regulatory and official authorization from the legal and official bodies in Egypt before the start of the research conduction, if needed.

Please be aware that study conduction will be monitored by the REC and only approved informed consent forms may be used when written informed consent is required.

Any changes in study or informed consent procedure must receive review and approval prior to implementation unless the change is necessary for the safety of subjects. In addition, you must inform the REC of adverse events encountered during the study or of any new and significant information that may impact a research participants' safety or willingness to continue in your study.
