Difficulties in Celiac Disease Diagnosis in Children – A ...

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC3150018>

Diagnosis of celiac disease in a patient with lactose intolerance has special importance having implications for the treatment of both diseases. The authors present the case of a 2 years old girl, first diagnosed with enterocolitis, but her clinical evolution revealed a complex situation: both celiac disease and secondary lactose intolerance.

Research discovery could revolutionise testing for coeliac ...

<https://www.coeliac.org.au/news-stories/research-discovery-could-revolutionise-testing...> ▾

Aug 08, 2019 - Researchers have discovered distinct markers in the blood of people with coeliac disease that appear within a few hours of gluten being consumed. The important finding address a longstanding mystery about what drives the adverse reaction to gluten in coeliac disease and could

Celiac Disease

Medical Condition

A chronic immune mediated disorder triggered by gluten ingestion.

- Common (More than 200,000 cases per year in US)
- Often requires lab test or imaging
- Treatments can help manage condition, no known cure
- Can be lifelong

Caused due to the immune reaction against gluten Symptoms include vomiting, appetite loss, bloating and constipation The best approach is to follow gluten free diet.

Symptoms

The signs and symptoms may vary between children and adults. Mild cases do not show any symptoms.

Some of the common typical signs and symptoms of celiac disease include -

- Vomiting
- Poor appetite

Diagnosing coeliac disease: Out with the old and in with the new?

Charlesworth RPG. Diagnosing coeliac disease

Richard PG Charlesworth

Abstract

Coeliac disease (CD) is a complex condition resulting from an interplay between genetic and environmental factors. When diagnosing the condition, serological testing and genotyping are useful in excluding CD, although the gold standard of testing is currently histopathological examination of the small intestine. There are drawbacks associated with this form of testing however and because of this, novel forms of testing are currently under investigation. Before we develop completely novel tests though, it is important to ask whether or not we can simply use the data we gather from coeliac
