Including results for eye **metastases** in lung adenocarcinoma anterior scleritis a case report.

Do you want results only for Eye metastasis in lung adenocarcinoma anterior scleritis: A case report?

## Ocular metastasis from breast carcinoma simulating ...

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC5572158>

Here we report a rare case of choroidal metastasis extending anteriorly causing a tender subconjunctival swelling similar to anterior scleritis. This case report serves as an indication that any signs of anterior scleritis in a patient with underlying breast cancer could be associated with ocular metastasis.

## Ocular metastasis from breast carcinoma simulating ...

<https://www.ncbi.nlm.nih.gov/pubmed/28844204>

Aug 28, 2017 · Computed tomography of her chest was then done and showed multiple metastases in both lungs. CONCLUSION: This case report highlights the fact that any unusual ocular presentation, even one simulating anterior scleritis, in a patient with a history of breast cancer should raise suspicion of metastasis.

## Anterior scleritis as the presenting sign of metastatic ...

<https://bj.o.bmj.com/content/92/1/147.1> ▾

Jan 01, 2008 · In this report, we describe a case of anterior scleritis as the presenting sign of lung adenocarcinoma. We did not suspect a metastatic lesion initially as our patient had no history of malignancy. Appropriate systemic evaluation (physical exam, laboratory, imaging) is indicated, especially in cases of scleritis unresponsive to topical and systemic corticosteroids.

## Eye metastasis in lung adenocarcinoma anterior scleritis: A case report

Hua-Fei Chen, Wen-Xian Wang, Xiao-Feng Li, Li-Xin Wu, You-Cai Zhu, Kai-Qi Du, Chun-Wei Xu

### Abstract

#### BACKGROUND

The eye is a rare site for lung cancer metastasis. Indeed, ocular metastasis is one of the greatest challenges to quality of life in a cancer patient. Here we present a patient with lung adenocarcinoma and ocular metastasis.

## Scleritis as a Presenting Sign of Stage IV Lung Adenocarcinoma

[https://journal.chestnet.org/article/S0012-3692\(17\)32229-8/fulltext](https://journal.chestnet.org/article/S0012-3692(17)32229-8/fulltext)

Our case demonstrates two potential vision compromising complications of choroidal metastasis as the presenting signs of underlying lung cancer, specifically serous retinal detachments and scleritis. CONCLUSIONS: Scleritis as an initial presentation of metastatic cancer may be rare, however, it has been described in the literature. As in this case, there are times when scleritis is the first and only ...
