The manuscript entitled "Diagnostic and clinical significance of antigen-specific pancreatic antibodies in inflammatory bowel diseases: a meta-analysis" was examined carefully for meeting the requirements of academic publishing in English by two of the co-authors (Dr. Dimitrios P. Bogdanos and Dr. Maria G. Grammatikopoulou).

Both Dr. Dimitrios P. Bogdanos and Dr. Maria G. Grammatikopoulou have been trained and educated at a higher educational level in the United Kingdom and have written and published more than 250 scientific papers in the English language. Their command in the English language is exceptional and documented by their academic degrees issued by British Academic Institutions.
