SPECIFIC COMMENTS TO AUTHORS

To Authors, The manuscript titled “ A global whole family based-Helicobacter pylori infection management strategy to prevent its related diseases and gastric cancer” was reviewed. This study has mentioned about to screen, identify, treat and follow up all H. pylori-infected individuals in the entire family. This strategy can prevent the spreading of H. pylori, and reduce its long-term complications among family members. This study also points out the importance of family screening for preventing gastric cancer. However, all abbreviations should be checked in the text again. They should be rewritten together with an explanation in the first using (eg., IM). This study deserves priority publishing.

SPECIFIC COMMENTS TO AUTHORS

1) Title or guide line that author tried to propose ma be useful in China. The title should be added the words "in China". 2) There's guideline summary by 2 tables. However, there's summary of (*) all references and I could not define all informative data in table came from all source or which reference. 3) Conclusion is full of bias and I think the author should give more positive aspect of each methods. How to summary after discussion, the author may suggest more than one method because of different circumstance in each country. However, if only using in high incidence of bacterial infection and high incidence of gastric cancer, the author may mention how to define or modified recent guidelines.
