## Helicobacter pylori eradication for preventing gastric cancer

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC4024774>

May 21, 2014 - Core tip: The treatment of gastric cancer (GC) is challenging. Elimination of a major risk factor, **Helicobacter pylori** (**H. pylori**) **infection**, represents an important approach for the **prevention** of GC. However, the feasibility and appropriate timing of this **strategy** remain to be determined.

## Helicobacter pylori eradication for preventing gastric cancer

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC4024774>

May 21, 2014 · Helicobacter **pylori** (H. **pylori**) infection is a major risk factor for **gastric cancer** (GC) development, which is one of the most challenging malignant **diseases** worldwide with limited treatments. In the multistep pathogenesis of GC, H. **pylori** infection slowly induces chronic active gastritis, which progresses through the premalignant stages of atrophic gastritis, intestinal metaplasia, and ...

## Helicobacter pylori Update: Gastric Cancer, Reliable ...

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC4375058>

Helicobacter **pylori** infection contributes to development of diverse **gastric** and extra-gastric **diseases**. The infection is necessary but not sufficient for development of **gastric** adenocarcinoma. **Its eradication** would eliminate a major worldwide cause of **cancer** death, so there is much interest in identifying how, if, and when this can be accomplished.
