#### **SPECIFIC COMMENTS TO AUTHORS**

Very well-written manuscript. There are no absolutely reasons why I should not advice publication of this paper. You exposed clearly your case and made a rich discuss on the topic. Images are high-quality, representing the main steps and features of the clinical case. These are all the reasons why I recommend this paper to be published with high priority.

#### **SPECIFIC COMMENTS TO AUTHORS**

The authors reported a case with Bouveret's syndrome which was defined as a gastric outlet obstruction after passage of a gallstone through a fistula into the duodenum. The patient was treated successfully with endoscopic laser lithotripsy instead of surgery due to her older age, clinical condition and her wishes. It was believed by the authors that laser lithotripsy can be considered an effective non - invasive therapeutic alternative to surgical treatment in Bouveret's syndrome. This is a very interesting and well-organized paper. There is one minor problem with this paper: The Journal name should be given in reference 3.
