## Transarterial chemoembolization and bland embolization for ...

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC3964379>

Mar 28, 2014 - Core tip: In the current article, we review the use of transarterial chemoembolization (TACE) and transarterial embolization (TAE) for hepatocellular carcinoma and we focus on the evidence for their use. Apart from their use in intermediate stage hepatocellular carcinoma, we also review the evidence for their use as neo-adjuvant treatment in the pre-transplant setting.

### Abstract

#### BACKGROUND

Transarterial chemoembolization (TACE) is recommended to patient with intermediate hepatocellular carcinoma (HCC) by treatment guidelines, while a large number of patients with advanced HCC also receive TACE in clinical
