

PEER-REVIEW REPORT

Name of journal: World Journal of Gastroenterology

Manuscript NO: 53324

Title: Is the measurement of drain amylase content useful for predicting pancreas-related complications after gastrectomy with systematic lymphadenectomy?

Reviewer's code: 02739495

Position: Peer Reviewer

Academic degree: PhD

Professional title: Professor

Reviewer's country: China

Author's country: Japan

Manuscript submission date: 2019-12-24

Reviewer chosen by: AI Technique

Reviewer accepted review: 2019-12-25 03:40

Reviewer performed review: 2019-12-25 03:59

Review time: 1 Hour

SPECIFIC COMMENTS TO AUTHORS

The authors drew the conclusion: The measurement of D-AMY is promising because of its high predictive ability of POPF, though many problems still remain unresolved. Prospective clinical trial could be imperative in order to develop D-AMY measurement in common clinical practice for gastric surgery. The conclusion appropriately summarized the data that this study provided. The manuscript is well written and seemed to be reasonable.
