Dear Editor: The authors summarized the literatures for age onest of diabetes with the risk of mortality. The topic is interesting but should fall in the category of view points or editorial. For a mini-review, the contents are not sufficient for the readers.

Answers

Thank you for your suggestion. We have added to the manuscript, but we are okay to publish it as an editorial as suggested.

Reviewer2

It is a good review, because despite being mini, it is updated and provides very interesting data.

Reviewer3

The manuscript is extremely short, almost an abstract, so In the current format is not suitable for publication in the journal
